CONTENTS

7. REACTION KINETICS

Surface phenomena in hydrogen absorption kinetics of metals and intermetallic compounds 1
E. Fromm and H. Uchida (Stuttgart, F.R.G.)

Role of nucleation in some hydride formation kinetics 13
N. Gerard (Dijon, France)

Magnesium mechanical alloys for hydrogen storage 25
E. Ivanov, I. Konstanchuk, A. Stepanov and V. Boldyrev (Novosibirsk, U.S.S.R.)

The formation of hydride in pure magnesium foils 31
A. Schrøder Pedersen, K. Jensen, B. Larsen and B. Vigeholm (Roskilde, Denmark)

The effect of methane on the rate of hydrogen absorption by $LaNi_5H_x$ in liquid suspension 41
J. J. Reilly, J. R. Johnson and T. Gamo (Upton, NY, U.S.A.)

Dynamic characteristics of the hydrogen sorption process in $MmNi_{4.15}Fe_{0.85}H_x$ compacts 51
M. Ron and Y. Josephy (Haifa, Israel)

Reaction kinetics of $LaNi_{4.79}Al_{0.21}$-hydride 61
H. Bjurström and S. Suda (Tokyo, Japan)

Hydriding and dehydriding characteristics of mechanically alloyed mixtures Mg–$x$wt.%Ni (x = 5, 10, 25 and 55) 71
M. Y. Song (Talence, France), E. Ivanov (Novosibirsk, U.S.S.R.), B. Darriet, M. Pezat and P. Hagemuller (Talence, France)

The kinetics of the absorption of hydrogen by $LaNi_5H_x$ suspended in aqueous solutions 81
T. Gamo, J. R. Johnson and J. J. Reilly (Upton, NY, U.S.A.)

Hydriding properties of mechanical alloys Mg–Ni 89
A. Stepanov, E. Ivanov, I. Konstanchuk and V. Boldyrev (Novosibirsk, U.S.S.R.)

On the kinetic model of magnesium hydriding 99
K. B. Gerasimov, E. L. Goldberg and E. Yu. Ivanov (Novosibirsk, U.S.S.R.)

A study of the hydriding kinetics of Mg_2Ni 109
J. S. Han and J.-Y. Lee (Seoul, Korea)

Thermal desorption spectra of hydrogen from $LaNi_5$ 117
A. Resnik, M. Stioui, A. Grayevsky and D. Shaltiel (Jerusalem, Israel)

Kinetics of hydrogen absorption of titanium/metal (vanadium, chromium, manganese, iron, nickel) sandwich films with and without oxygen precoverage at 300 K . . 125
H. Uchida and E. Fromm (Stuttgart, F.R.G.)

© Elsevier Sequoia/Printed in The Netherlands

Elements of hydride formation mechanisms in nearly spherical magnesium powder particles. 133
B. Vigeholm, K. Jensen, B. Larsen and A. Schrøder Pedersen (Roskilde, Denmark)

*Room temperature oxidation of $LaNi_5$ and the reaction mechanisms of initial hydrogen absorption by $LaNi_5$. 143
H. Uchida and M. Ozawa (Kanagawa, Japan)

*Kinetics and mechanism of the hydriding reaction of magnesium activated by cycling 143
K. B. Gerasimov and E. Yu. Ivanov (Novosibirsk, U.S.S.R.)

8. NOVEL HYDRIDES SYSTEMS

Concentration dependence of hydrogen mobility in CuTi amorphous hydrides 145
A. J. Dianoux, B. Rodmacq and A. Chamberod (Grenoble, France)

Coexistence of hydrogen and carbon solutes in the palladium lattice 157
S. B. Ziemecki, G. A. Jones and D. G. Swartzfager (Willmington, DE, U.S.A.)

A new pathway to Mg_2Ni and an Mg–Ni carbide 163
B. Bogdanović, K.-H. Claus, S. Gürtzgen, B. Spliethoff and U. Wilczok (Mülheim an der Ruhr, F.R.G.)

Preparation and intercalation into graphite of some alkali metal hydrides. 173
D. Guerard, N. E. Elalem, S. El Hadigui, L. Ansari, P. Lagrange (Vandoeuvre lès Nancy, France), F. Rousseaux, H. Estrade-Szwarckopf, J. Conard and P. Lauginie (Orléans, France)

The hydriding properties of a mechanical alloy with composition Mg–25%Fe 181
I. G. Konstanchuk, E. Yu. Ivanov (Novosibirsk, U.S.S.R.), M. Pezat, B. Darriet (Talence, France), V. V. Boldyrev (Novosibirsk, U.S.S.R.) and P. Hagenmuller (Talence, France)

Hydrogen sorption properties of $D8_8$-type systems
III. The effect of germanium substitution in $Y_{5-a}Sc_aSi_3$ phases 191
I. J. McColm and V. Kotroczo (Bradford, U.K.)

Structural characterization of RNi_2 (R ≡ La, Ce) intermetallic compounds and their hydrides 201
V. Paul-Boncour, A. Percheron-Guégan, M. Diaf and J. C. Achard (Meudon, France)

*Hydrides of the double metal-layered monohalides: structural and bonding features of Zr_2Br_2H, ZrBrH and $UClH_x$ type phases 209
S. D. Wijeyesekera and J. D. Corbett (Ames, IA, U.S.A.)

*Crystal–glass transition by hydrogen absorption and structure of amorphous Zr–X hydrides 210
K. Samwer (Göttingen, F.R.G.)

9. APPLICATIONS

Properties of metal hydrides for use in industral applications 213
O. Bernauer and C. Halene (Mülheim an der Ruhr, F.R.G.)

The dynamics of hydrogen transfer in a metal hydride heat pump. 225
H. Bjurström, Y. Komazaki and S. Suda (Tokyo, Japan)

*Abstract.

Heat and mass transfer in metal hydride reaction beds: experimental and theoretical results 235
U. Mayer, M. Groll and W. Supper (Stuttgart, F.R.G.)

The potential of hydrogen in permanent magnet production 245
I. R. Harris (Birmingham, U.K.)

Properties of tritium and ^{3}He in metals 263
R. Lässer (Jülich, F.R.G.)

Use of vanadium-based solid solution alloys in metal hydride heat pumps. 275
G. G. Libowitz and A. J. Maeland (Morristown, NJ, U.S.A.)

Capture of liquid hydrogen boil-off with metal hydride absorbers. 283
M. J. Rosso and P. M. Golben (Wyckoff, NJ, U.S.A.)

Swelling of selected metal tritides. 293
T. Schober, R. Lässer, C. Dieker and H. Trinkaus (Jülich, F.R.G.)

Hydrogen absorption properties of $FeTi_{1+x}$-rare earth oxide composite materials 301
J. Suzuki, M. Abe, T. Yamaguchi and S. Terazawa (Tokyo, Japan)

Capacities and durabilities of Ti–Zr–Ni alloy hydride electrodes and effects of electroless plating on their performances 311
S. Wakao, H. Sawa, H. Nakano, S. Chubachi and M. Abe (Kanagawa, Japan)

An investigation of the removal of hydrogen from gas mixtures using misch-metal-based hydrogen storage metals 321
Q. D. Wang, J. Wu, C. P. Chen and Z. Ye (Zhejiang, China)

Hydrogen purification with metal hydrides in a new kind of reactor 329
F. R. Block, A. Dey, H. Kappes (Aachen, F.R.G.) and K. Reith (Gelnhausen, F.R.G.)

Contribution of cathodic charging to hydrogen storage in metal hydrides. 337
J. Chene (Orsay, France)

Static, dynamic and cycling studies on hydrogen in the intermetallics $LaNi_5$ and $LaNi_{4.77}Al_{0.22}$ 349
P. Dantzer (Orsay, France)

Hydriding and dehydriding characteristics of $LaNi_5$ mixed with silicone compounds 365
H. Uchida, T. Ebisawa, K. Terao, N. Hosoda and Y. C. Huang (Kanagawa, Japan)

Hydrogen storage and isotopic protium–deuterium exchange in graphite–potassium intercalation compounds. 371
P. Lagrange, D. Guérard, J. F. Mareche and A. Herold (Vandoeuvre-lès-Nancy, France)

Calcium- and nickel-substituted lanthanum–magnesium alloys for hydrogen storage 379
M. Khrussanova and P. Peshev (Sofia, Bulgaria)

Thermodynamics of the hydride chemical heat pump:
III. Considerations for multistage operation 385
E. Orgaz and P. Dantzer (Orsay, France)

An investigation of the mechanical behaviour of hydrogen storage metal beds on hydriding and dehydriding and several methods of preventing the damage of hydride containers caused by the expansion of hydrogen storage metals. 399
Q. D. Wang, J. Wu, C. P. Chen and Z. P. Li (Zhejiang, China)

Effect of hydrogen absorption on the magnetic properties of $Nd_{15}Fe_{77}B_8$ 409
G. Wiesinger, G. Hilscher and R. Grössinger (Vienna, Austria)

Hydrogen dependence of the intrinsic magnetic properties of $R_2Fe_{14}B$ 419
J. M. D. Coey, A. Yaouanc, D. Fruchart (Grenoble, France), R. Fruchart and Ph. L'Héritier (St. Martin d'Hères, France)

*Olefin hydrogenation over some $LaNi_{5-x}M_x$ intermetallic compounds. 425
J. Barrault, A. Guilleminot (Poitiers, France), A. Percheron-Guégan, V. Paul-Boncour and J. C. Achard (Meudon, France)

*Effective thermal conductivity of a metal hydride bed augmented with a copper wire-net matrix 426
M. Nagel, Y. Komazaki and S. Suda (Tokyo, Japan)

*Evidence for the role of a "hydridic" hydrogen on the selective hydrogenation of ethyl acetate to ethanol with the bimetallic system Rh–Sn supported on silica 426
J. P. Candy (Villeurbanne, France), O. Ferretti, G. Mabillon, J. P. Bournonville (Rueil Malmaison, France) and J. M. Basset (Villeurbanne, France)

*Electrochemical hydriding of a metal with a solid protonic conductor electrolyte: the composite "$Ti_{1.1}Ni$"H_2/HUP electrode 427
P. de Lamberterie, M. Forestier, J. Guitton, A. Rouault and R. Fruchart (Saint Martin d'Hères, France)

*Dynamic behaviour of paired metal hydrides. 428
M. Nagel, Y. Komazaki, Y. Matsubara and S. Suda (Tokyo, Japan)

*Hydrogen storage by pure and calcium-substituted $LaMg_{12}$ alloys 428
M. Pezat, J. P. Manaud, B. Darriet (Talence, France), M. Khrussanova, M. Terzieva and P. Peshev (Sofia, Bulgaria)

*Model description of carbon monoxide passivation during metal hydriding 429
R. Heinen, H. J. Leyers, T. Serpekian and D. Stöver (Jülich, F.R.G.)

*Effect of alloying on hydride formation in the Pd–Re system 430
S. B. Ziemecki, G. A. Jones and J. B. Michel (Wilmington, DE, U.S.A.)

Investigation of the electromigration of tritium in tantalum. 431
R. Pietrzak (Opole, Poland) and B. Rozenfeld (Wrocław, Poland)
